

Homework: Complete this Water Log

This data chart can help you track how much water your family uses in a day. Every time someone uses water in one of the ways listed on the chart, make a checkmark in the column with the title, "Tally." Your teacher will tell you if you should complete the rest of the chart before you come back to class.

Activity	Tally (Number of Times)	Water Used Each Time	Total Amount Used for this Activity
Flush toilet		2 gallons	
Take a bath		30 gallons	
Take a shower for ten minutes. (If the shower lasts for 20 minutes, make two check marks. If it lasts 30 minutes, make three check marks.)		30 gallons	
Run Dishwasher		20 gallons	
Wash a Load of Laundry		35 gallons	
Clean Kitchen Surfaces		1 gallon	
Wash Face or Hands for 2 minutes (If it takes longer, try to figure out the right number of check marks to make.)		4 gallons	
Brush Teeth for 2 minutes		4 gallons	

Total amount of estimated water use for your family for one day: _____
